

The Challenge or problem

Technical Challenge:

- The Health service has massive amounts of complex patient data to deal with, it can be structured or unstructured;
- Confidentiality of the data is paramount to public confidence in the service and also to national security;
- Whether the data is centralised or decentralised it makes no difference if no one knows exactly what is in the systems;
- Different users with different skill sets.

Environment Challenge:

- Resource allocation in difficult economic times. Patient data may be a 'perceived' lesser priority;
- The Health service doesn't operate in isolation to the rest of the public sector;
- Public support and concerns over confidentiality;
- Multiple stake holders with many different challenges: local vs. central government.

Primary interests

- AnnanTech has extensive experience in providing major organisations with speedy, straightforward access to large amounts of complex information in high-value environments;
- Our experience spans
 - Information Assurance,
 - Risk Management,
 - Business Continuity,
 - Security; and
 - Finance
- AnnanTech's specialist technical skills are ranked top 1% within information management.

The Approach to address the Challenges

- Adopt a risk management approach and processes that are tailored to each organisation;
- Combined with a tool that can manage complexity ie. The full picture of patient information and all stakeholders, and also manages flexibility/change – 'lego block approach' not monolithic, a framework that can change as users/patient's requirements change that incorporates new compliance, new technologies, existing frameworks must be able to cope and not re-engineer everything from scratch;
- Administrative backbone for information management and information assurance;
- WISDOM SPF automates all the mandates within the HMG Security Policy Framework(SPF). Can also assist with our areas that are specific to healthcare and the information assurance sector as a whole;
- WISDOM SPF is a COTS for Level 1, and additional capabilities and tools are available for larger organisations within specialist requirements;
- WISDOM SPF has full audit capability, is secure and user friendly for information sharing in a controlled environment.

Goals in attending workshop

- Contribute to the discussion
- Network with like minded individuals and potentially partner with other organisations
